

Wireless Tension Link Systems

Wireless WL700 Options

The M2000 can be replaced with many indicator options.

TI500

Portable Data Case

The same options can be applied to all other Massload loadcells.

A Wireless WL-700 Tension Link Weighing system could include, for example:

- 4 Wireless WL700 Tension Links with transmitters, 1 WL8900 Handheld PDA with receiver, Tension Master Software operating on the PDA, and Tension Master Desktop software operating on a computer to Hotsync data from the PDA to the computer.
