

Epson TMU-295 Slip Printer

The TM-295 is the smallest slip printer available today. Widely used by many companies from hospitality to banking, and of course scale operators, the TM-295 offers printing capabilities of normal, double and quadruple size print in either horizontal or vertical formats. The TM-295 will print multi-part copies. The TM-295 is available in either serial or parallel versions and meets all world-wide regulatory requirements including UL, CSA and CE mark. The TM-295 utilizes PS-170 Universal Power Supply which is an auto-switching supply for the many markets in which it is installed. The TM-295 is Windows and OPOS compliant. Now available in Epson Dark Gray (EDG). The low voltage requirement makes it ideal for portable weighing solutions.

Power: 12VDC
Paper Type Slip
Interface RS-232
Print Type Impact dot matrix

NCI WP-233D Tape Printer

The WP-233D Dot Matrix Printer fits easily into any system. Ease of use is an important part of the instruments design. It even prints on standard 2 1/2-inch adding machine paper. Measuring 4 1/2"x 4"x 2", the tiny WP-233D Dot Matrix Printer fits anywhere. It easily becomes a part of any system, providing critical hard copy records of test data. Field configurable: Setup choices with single rocker switch: baud rates, characters per line, handshake settings, dot matrix pattern, double high, double wide, double high/double wide or inverted print.
